PROFESSIONAL SUMMARY

Senior Software Engineer with 3 years building production, multi-tenant, internationally localized web applications at Dubizzle Labs. Drove the frontend of the Hatla2ee migration from PHP Laravel to Next.js across 7 MENA country tenants serving millions of users, as one of the core engineers on the project. Strong on Next.js, React, TypeScript, and Tailwind, with hands-on experience in search integration, performance, and agentic development workflows. Comfortable owning architecture, mentoring engineers, and turning ambiguous requirements into shipped software.

WORK EXPERIENCE

Dubizzle Labs, Senior Software Engineer

Lahore, Pakistan | June 2026 to Present

- Drove the frontend of the Hatla2ee migration from PHP Laravel to a multi-tenant Next.js architecture, serving a platform with millions of users across 7 MENA country tenants (Egypt, Oman, Qatar, Jordan, KSA, UAE, Kuwait)
- Improved Core Web Vitals across the migrated platform, reaching "Good" status for nearly all desktop URLs and roughly 60 to 70 percent of mobile URLs in Google Search Console, with almost no "Poor" URLs remaining, and continuing to drive the remaining mobile pages up
- Made architectural decisions for the multi-tenant setup: tenant-aware routing, locale handling, shared component architecture, and per-tenant configuration
- Built and run a multi-agent SDLC workflow in Claude Code (implementation, code, and review agents with a plan-gate before any code), using agentic tools to plan, implement, test, refactor, and prepare PRs while critically reviewing AI-generated code before it ships
- Integrated Amazon OpenSearch for the classifieds search experience, including query design and tuning across the migrated frontend
- Acted as one of the primary engineers on the migration, owning core frontend workstreams end to end from architecture through production
- Mentored junior engineers through code reviews, pair-programming, and architectural guidance
- Performed production hotfixes and critical bug fixes to maintain uptime across live tenants

Dubizzle Labs, Software Engineer

Lahore, Pakistan | March 2024 to June 2026

- Progressed into a core role on the Hatla2ee migration and multi-tenant frontend platform, taking on architecture and mentoring responsibilities that led to promotion to Senior
- Shipped the localized, multi-tenant frontend for Dubizzle Motors Egypt, a car classifieds platform tailored to the Egyptian market
- Implemented the localized, multi-tenant frontend for Bayut.sa, a property classifieds platform for Saudi Arabia

Dubizzle Labs, Associate Software Engineer

Lahore, Pakistan | July 2023 to March 2024

- Contributed to OLX Motors and Zameen.com with feature work, new pages and sections, and bug fixes across classifieds platforms
- Refactored and stabilized shared frontend code across multiple platforms, improving maintainability for the wider team

AGENTIC DEVELOPMENT

- Designed and run a multi-agent SDLC loop: an implementation agent plans, a code agent implements, and a code-review agent checks output against requirements and standards, routing failing work back to re-plan and re-implement until it passes
- Enforce a documented plan-gate so agents align on a design before any code is generated, keeping human judgment in control of architecture
- Authored custom Claude skills and reusable agent workflows; review AI-generated code critically for correctness, security, and maintainability, and know when to slow down or turn the agent off

SKILLS

Frontend (primary): Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML/CSS

Architecture: Multi-tenant systems, internationalization (i18n), shared component design, search integration (Amazon OpenSearch), Core Web Vitals and performance

Agentic development: Claude Code, multi-agent SDLC workflows, custom Claude skills, AI-assisted planning, testing, refactoring, and review

Full-stack (working): Node.js, REST APIs, SQL, PostgreSQL

Tooling: Git, GitHub, PR review, CI/CD, JIRA, AWS (basics), Vercel

EDUCATION

BS Computer Science, Information Technology University, Lahore (2019 to 2023)
